Federal Grants

The United States government distributes trillions of dollars annually in grants, contracts, loans and other financial assistance. In FY 2015 alone, the Federal government spent \$614 billion on grants, \$437 billion in contracts, \$5 billion in loans, and a whopping \$1.78 trillion on other financial aid.

John Dunham and Associates (JDA) has developed a proprietary technology based on years of research and proprietary search algorithms that can readily search this \$2.8 trillion segment of the economy to give your industry a competitive advantage whether that advantage be in business development, competitive intelligence, or if you are fighting a regulatory action!

With historic data going back to 2000, JDA can provide clients with the most impactful data, research, and analytical support related to Federal grants.

- Government relations professionals can use grant data to effectively lobby for tax/regulatory relief
- Wall Street firms can monitor how companies reliant on government contracts perform relative to their peers
- Non profits can analyze trends to assist with grant management and future planning
- State budget offers can use data for benchmarking reports
- Business strategists can build more proactive business development plans
- Public relations teams have fresh information with which to reach new stakeholders
